WORK EXPERIENCE

Front End Software Engineer

Wells Fargo

08/2019 – Present

Achievements/Tasks

- Technical lead on the client-side web application and npm package
- Successfully drove prototype application to client-facing product

Full Stack Software Engineer

Groove

04/2018 – 06/2019

A SaaS company that delivers productivity solutions to Salesforce users

Achievements/Tasks

- Implemented performance-oriented use of React, Redux, and Immutable.js to create new and reworked existing user-facing features.
- Constructed robust delivery systems that utilize the Salesforce API to help end users keep track of their sales ecosystem.
- Ownership of features and products built.

Front End Software Engineer

Amber Kinetics

12/2017 – 04/2018

An engineering firm that provides robust energy storage systems for long term use in remote locations

Achievements/Tasks

- Spearheaded the shift to React, Redux, and TypeScript to write a high performance web app.
- Utilized D3.js for data visualization from a WebSocket data stream.

PERSONAL PROJECTS

react-on-images-loaded

- Open source contribution
- +4k downloads per month

Tansaki (in development) (04/2018 – Present)

- Anime discovery service with production-level features.
- React/Redux + TypeScript frontend, Ruby on Rails backend.
- JSON web tokens for stateless user sessions.
- Unit testing with Jest and Enzyme.

EDUCATION

Master of Science

Texas A&M University

08/2013 – 12/2015

Thesis

- Statistical Analysis of petrochemical technologies

College Station, TX
